I think my tape is 200'. I'll pick up a wheel if I can find a durable all-terrain model. What are we cutting with a chain saw?

A long tape measure – 300 ft would be helpful. You might want to bring a chainsaw. If you cannot, I will bring my own.

Thanks

I was planning on picking up a bundle of pin flags to mark out the route we scout for the GK>RnB aqueduct. Anything else you want me to pack, or do you already have flags?
